

1. Company name, location, and business plan

Company name: GameSage

Location: Málaga, Spain

Company description

GameSage is an innovative online video game store (web and mobile) focused on delivering a fast, personalized discovery and purchase experience. The core feature is an integrated AI chat assistant that helps users find games based on tastes, mood, mechanics, or vague descriptions. GameSage specializes in digital game keys for all major platforms and emphasizes accessibility, personalization, and consistently competitive pricing.

Business plan

Main products & services

- **Digital game sales:** Official, verifiable game keys for PC and console platforms (Steam, Epic, PSN, Xbox, Nintendo). Keys are delivered automatically after purchase with step-by-step activation guides.
- **AI recommendation assistant:** An integrated chat that interprets natural language, refines recommendations with user feedback, and returns justified suggestions with direct purchase links.
- **Loyalty program:** Reward points earned with purchases that can be redeemed for discounts or products.
- **Promotions & giveaways:** Regular campaigns and periodic free-game promotions to increase engagement.
- **VIP subscription:** Premium tier offering early access to deals, exclusive discounts, and other perks.
- **Flexible payments:** Multiple payment options, including card, digital wallets, and selected crypto payment methods. All payment flows follow strict security practices.

Target customers

Primary audience: gamers aged **15–40** who frequently purchase digital games, are price-aware, and open to using tools that simplify discovery (AI assistants, personalized offers). They include casual and core players who value convenience, variety, and good deals.

Market segmentation

- **Demographic:** 15–40 years old, mixed gender, medium to medium-low disposable income, digitally native.

- **Psychographic:** Players who enjoy discovering new titles, are price conscious, and are receptive to tech innovations.
- **Behavioral:** Users who spend time browsing catalogs but often fail to find suitable titles, or who remember only fragments of a game description—ideal candidates for AI-assisted discovery.

Revenue model

- **Direct sales** of digital keys (primary revenue).
- **Subscription fees** from VIP plans.
- **Affiliate and partnership income** with publishers and authorized distributors.
- **Promotional revenue** from featured campaigns and possible sponsored placements (kept transparent to preserve recommendation integrity).

Competitive advantage

GameSage differentiates itself by combining **accurate, explainable AI recommendations** with **consistently low digital prices**. Instead of prioritizing sponsored items, the platform focuses on user satisfaction: helping players discover games they will enjoy while minimizing cost. Pricing competitiveness is achieved through legitimate regional sourcing strategies, volume purchasing from authorized suppliers, and close monitoring of official promotions—always ensuring legal provenance and verifiability of keys. Additional value comes from instant key delivery, clear activation guides, a points system for retention, and support for modern payment methods.

Operational and location details (brief)

- **Initial market:** Spain (Spanish language), with potential expansion to international markets and English localization later.
- **Headquarters:** Address: Calle Alcalde Garret y Souto 20, 1st floor, Málaga, 100 m², 2 bathrooms, Technical raised floor, False ceiling, Good condition, 500€/month, Deposit: 2 months

2. Organizational structure
